PROFESSIONAL EXPERIENCE

Morgan Stanley

New York, NY

Software Engineering Intern – Fixed Income Trading Infrastructure

Jan. 2025 – June 2025

- Designed/deployed internal trading portal tools enabling 25+ traders to execute relative value strategies across client accounts
- Led development of 12 API endpoints serving position data for 47,000+ accounts, reducing portfolio retrieval latency by 40%
- Conducted user acceptance testing with trading desk users and validated bond security data to ensure portfolio accuracy

Massachusetts Institute of Technology (MIT) – Digital Currency Initiative

Cambridge, MA

Research & Engineering Intern

June 2024 – Aug. 2024

- Co-authored research paper on UTXO vs account-balance CBDC architecture informing EU policymakers on digital Euro
- Participated in technical strategy sessions with Bundesbank, Bank of Canada, and Bank of England officials on CBDC designs
- Optimized Lua smart contract execution by 35% and enhanced wallet UI prototype minting capabilities for central bank testing

Federal Reserve Bank of Boston

Boston, MA

Applied Fintech Research Intern - Central Bank Digital Currencies (CBDCs)

July 2023 – Dec. 2023

- Investigated digital currencies, stablecoins, and distributed systems, supporting Fed decision-making on retail/P2P systems
- Presented fintech research findings to 30+ staff and conducted 15 code reviews for prototype transaction processor codebase
- Prepared briefing material for and attended meetings with senior federal reserve officials and improved onboarding workflow

University of Nevada, Reno

Reno, NV

Research Assistant – Prof. Mehmet S. Tosun (Dept. of Economics) (Part-time)

July 2020 – May 2022

- Conducted quantitative and qualitative economic research and presented key findings at World Bank governance webinar
- Created data visualizations and regression analyses using Stata to support published research on local/regional development
- Built automated Python pipeline for economic data processing, reducing manual data preparation time and saving 3.5hrs/week

Nevada Governor's Office of Economic Development

Carson City, NV

Economic Research Intern

Sept. 2020 – Feb. 2021

- Advised senior cabinet members on economic strategy and helped provide recommendations regarding infrastructure projects
- Collaborated with team of 10 to draft policy proposals and legislative brief informing decision making of state officials
- Led project/presented findings resulting in the adoption of a targeted approach to development/recovery initiatives statewide
- Assisted with organizing virtual trade missions aimed at attracting foreign direct investment (FDI) from 70 companies across 19 countries leading to 7 new partnerships

LEADERSHIP & OTHER EXPERIENCE

Northeastern University

Boston, MA

Teaching Assistant – CS 5004: Object-Oriented Programming

May 2024 – Aug. 2024

- Organized/led recitations, taught Java/OOP fundamentals, helped refine course material, and graded over 250 assignments
- Tutored 75+ students leading to an improvement in on-time assignment submissions and provided support to students

Investment Club

Reno, NV

President, Co-Founder (UNR)

Jan. 2017 – Dec. 2018

- Founded a club to explore financial markets, analyzed current events, and taught portfolio management strategies/concepts
- Managed real-time, simulated portfolios with \$100,000 AUM and organized club wide performance competitions
- Led meetings, developed lesson plans, coordinated guest speakers, and promoted financial literacy to over 30 students
